

EXPORT / IMPORT PROCEDURE

Exporting into certain African countries

- Confirm the INCOTERM that will be utilised for the movement of these goods
- Check the requirements for exportation in a pre-inspection process
- Make contact with the local Bureau Veritas / SGS office to ask the conditions of export for the particular product
- Only once this process has been completed must the cargo be allowed to depart the manufacturer/suppliers facility.
- Should the cargo be hazardous the relevant MSDS certificate needs to be obtained and the correct packing needs to be organized
- Contact must be made with the freight forwarder/hauler to ensure that the cargo has been booked and if hazardous this needs to be shared with the freight forwarder to ensure that the cargo will move as booked
- Ensure that the packing list, invoice and if possible a certificate of origin is available for the freight forwarder to process the shipment are available. The Certificate of origin is available from the local Chamber of Commerce and invaluable when it comes to the end customer paying less duties for his landed products. (Full Details in the next module)
- Complete the shipping instruction form which is available from the relevant freight forwarder, this will ensure that goods are transported as per the instructions contained in the said document. Note it is illegal for the freight forwarder to sign this document on the exporters behalf
- Ensure that a goods received note (GRN) is issued by the forwarder to have proof that the goods are in their possession

- Ensure that the forwarder sends through a document pack which will illustrate that the goods have left the country including the SAD 500 form which shows proof of export

Import Procedure:

- Establish the terms of sale with the said supplier as well as the INCOTERM to be utilized.
- For China/Far East insist on FOB/FCA the respective airport/port so that the costs are clear on the invoice the supplier will issue
 - China/Far East suppliers are notorious for not disclosing the actual pricing of the goods by either hiding it in the freight or the reverse
 - The insurance that may be included will likely not be comprehensive, which should there be a claim, will lead to further complications
- Ensure supplier provides the packing list, invoice and certificate of origin in particular if importing from Europe/USA. More details regarding this in the next module
- Dependant on Incoterm ensure that the goods are packed correctly dependant on the hazardous nature of the goods
- Share details with the freight forwarder so that contact can be made with the supplier regarding the cargo specifics and incoterm to be utilised
- Complete the shipping instruction form which is available from the relevant freight forwarder, this will ensure that goods are transported as per the instructions contained in the said document. Note it is illegal for the freight forwarder to sign this document on the exporters behalf
- Goods would need to be customs cleared by the freight forwarder and a document would need to be received by the local entity
 - Bills of lading
 - Customs documents including SAD500 and Vat 404 report
 - Supplier documents and invoices
 - Total cost for the transportation of the shipment
- Goods would need to be received into the relevant warehouse with proof of receipt of this.
- Many options exist for warehousing more details in the next module
